Pythagorean Theorem - Word Problems (Worksheets, Solutions)

The relationship between distance, rate (speed) and time $\text{Distance} = \text{time} \times \text{rate}$ is used to solve uniform motion problems. Detailed solutions to the problems and explanations are provided.

Rate, Time Distance Problems With Solutions

Solving Word Problems Learning skills: defining the problem, defining knowns and validating Why Mathematical word problems (or story problems) require you to take real-life situations and find solutions by

Solving Word Problems - pcrest2.com

Most of the time when someone says "word problems" there is automatic panic. But word problems do not have to be the worst part of a math class.

Translating Word Problems into Equations - AlgebraLAB

In science education, a word problem is a mathematical exercise where significant background information on the problem is presented as text rather than in mathematical notation. As word problems often involve a narrative of some sort, they are occasionally also referred to as story problems and may vary in the amount of language used.
